

First2 Network Conference
May 16, 2024
MyNRMN

NRMN is the National Research Mentoring Network

Through their national network, they implement and disseminate innovative, evidence-based best practices to improve mentoring relationships at institutions across the country.

What is MyNRMN?

It is a powerful social networking platform for students and researchers across the biomedical, behavioral, social, and clinical sciences to connect with one another for anything from general questions about research and professional development as a scientist to scheduling more formal mentorship appointments one-on-one or as a group.

A young boy with short brown hair, wearing a dark blue long-sleeved shirt and tan pants, is climbing a colorful playground structure. He is holding onto green rings with both hands and has one leg extended horizontally. The structure consists of red vertical poles and green horizontal bars. In the background, there is a large, multi-story brick building with many windows. The scene is outdoors on a sunny day.

It's Free!

Funded by the National Institutes of Health

Let's take a look!

Benefits of having mentors

- Mentors offer valuable knowledge
 - They offer encouragement
 - They can provide guidance and collaboration in research
 - They can help you build networking opportunities
 - They can provide increased confidence
 - They can provide leadership development
 - They can provide constructive feedback
- 
- 

The MyNRMN community

8,471 mentors, 15,852 mentees, 30,339 active members. Ready to join our community?

Experience mentorship and professional development programs designed to hone your practices and deepen your connection to the diverse nationwide scientific community.

Thank you
